

WorldConnect and HTML

<http://www.family-genealogy-online.com/worldconnect-and-html.htm>

Adding Photographs and Hyperlinks to WorldConnect GEDCOM Files

Make sure you have configured your WorldConnect settings to accept html coding in your database.

Sign on to the [User Setup/Edit](#) page at WorldConnect

Choose Advanced >

User Code (required: letters, numbers, "-" and "_")
Password (required)
 Standard Advanced
First time users - select the Standard Setup. You can use the Advanced S

When your settings come up, go down to item 17 (Allow HTML in GEDCOM) and change that option to "Yes."

14) Homepage Title	The Little Family and Collateral Lines The text to show for the above URL
15) Page Heading	<center>Tracing the Little Family from Rowan County, N
16) Page Footer	Much of the information in this database is well docum
17) Allow HTML in GEDCOM	This option specifies if the program should escape html in the users GEDCOM. If no then the program will translate < to <, > to >, " to ", and & to &. If yes then you could include html inside your notes, sources, etc....

At the same time you might want to add more detail to #15 Page Heading and #16 Page Footer. NOTE: 511 Characters Allowed. Click Upload/Update. Because you haven't given WorldConnect a GEDCOM file address during this edit of your settings, it automatically knows you want to update your display settings and it applies the new setting to your existing (and future records) at WC. Check and see that your edits look like you want them to.

Screen Shot WorldConnect Heading and Footer

Actual Code

```
<b>Tracing the Little Family from Rowan County, NC, into Lincoln  
County, TN <br>  
Tracing the Winstons from Virginia into Tennessee and Alabama<br>  
Tracing the Bayless Family from Long Island, NY into Virginia,  
Tennessee, and Alabama<br>  
Tracing the Descendants of Josiah Brandon, A Revolutionary War  
Soldier<br>
```

WorldConnect and HTML

<http://www.family-genealogy-online.com/worldconnect-and-html.htm>

Tracing the Burley family of Henrico County, VA.

Also Tracing the Oldhams of Arkansas and the Boone Family

The easiest way to do this is to write what you want with word wrap off. You may need to copy and paste a line at a time if your text you let the text wrap.

Resulting Text

The screenshot shows the website 'Little Family Genealogy'. At the top, it says 'Entries: 2916 Updated: 2005-08-23 12:11:02 UTC (Tue)'. Below that is contact information for Patricia Little Geary at little@family-genealogy-online.com. A red arrow points to the text: 'Tracing the Little Family from Rowan County, NC, into Lincoln County, TN. Tracing the Winstons from Virginia into Tennessee and Alabama. Tracing the Bayless Family from Long Island, NY into Virginia, Tennessee, and Alabama. Tracing the Descendants of Josiah Brandon, A Revolutionary War Soldier. Tracing the Burley family of Henrico County, VA. Also Tracing the Oldhams of Arkansas and the Boone Family.' Below this is a search bar with the text 'Enter SURNAME OR SURNAME, GIVEN to find' and a 'List' button. At the bottom, there is a footer with the text '#16 Page Footer' and a red arrow pointing to it.

Now you can start designing the effects you'd like to see in you WorldConnect files. Create a simple html document with only

```
<html><head></head><body></body></html>
```

Your code will go between the opening and closing body tags.

Sample image code that will insert a thumbnail with a link to a larger image.

Screenshot and Sample Code

Code Example

```
<a title="Leonard Lee Little and Sammie Lipcomb Bayless Little (my grandparents)." target="_blank" href="http://www.family-genealogy-online.com/little/Photos/leonard-and-sammie-little.jpg">  
</a><br>  
Leonard Lee Little and Sammie Lipcomb Bayless Little<br>  
Click on thumbnail to view larger image - new window will open<br>
```

WorldConnect and HTML

<http://www.family-genealogy-online.com/worldconnect-and-html.htm>

Resulting Image Example

- *ID:* I5
- *Name:* Leonard Lee LITTLE
- *Surname:* Little
- *Given Name:* Leonard Lee
- *Sex:* M
- *Birth:* 9 Aug 1882 in Fayetteville, Lincoln, Tennessee ¹
- *Death:* 19 Dec 1969 in Adelphi, Prince Georges, Maryland ²
- *Burial:* 22 Dec 1969 Parklawn Cmtry, Rockville, Maryland
- *_UID:* DCAECD46EB845C4890EE8AEB54FE77C1AA6
- *Note:*

Leonard Lee Little and Sammie Lipcomb Bayless Little

WorldConnect and HTML

<http://www.family-genealogy-online.com/worldconnect-and-html.htm>

Once you're satisfied with the look of your test file when displayed as HTML, highlight the code you've created between the <body> and </body> commands and copy it to your clipboard. Start your genealogy program, go to the record where you want to include your new code, and add the code. I have found it easier to have both my web page editor and genealogy program both open and work between the two. Export your GEDCOM file and upload it to WorldConnect. Check and see if it looks like you want it to and that the link works. YOU MUST USE COMPLETE URL'S FOR FILES - [ABSOLUTE NOT RELATIVE](#).

Sample Pages:

[Robin Willingham Moore](#)

Would you like to add some style to your WorldConnect Database results. Would you like those pages to look more like your genealogy web site? See [WorldConnect and CSS](#)
